Anglia Examinations Sample Material

Section R1 (12 marks)

Read the passages about Anne and Bill and answer the questions. For each question, choose either A(Anne) or B(Bill). You need to choose each person more than once.

Marks Awarded

Anne (A)

I'm a dance teacher and I live in London. I live alone in a flat near the city centre. I love my flat and its little garden. I teach in the afternoons and evenings on Mondays, Wednesdays and Fridays. This is good for me, as I hate early starts. I teach adults in a sports centre. Next month, I'm going to start classes for children. I don't often talk to my colleagues at the sports centre because they're not very friendly.

Bill (B)

I'm a nurse. I work in a hospital in a small town. I live with my wife and two sons. We don't have a garden but there's a nice park near our house. I usually work during the week but once a month I work on Saturday and Sunday. I wake up at 6 am. I like to have time to read the news. I love my job because I help children who are ill. Also, my colleagues at the hospital are really friendly.

Which person, A(Anne) or B(Bill),...

works in a small town?	*example*	*B*
is married?	**1**	
has a garden?	**2**	
sometimes works at weekends?	**3**	
doesn't like getting up early?	**4**	
works with children?	**5**	
likes working with his/her colleagues?	**6**

Anglia Examinations Sample Material

Section R2 (13 marks)
Read the passage and answer all the questions.

Marks Awarded

An Unusual Mole

There are many different kinds of mole and we can find them on every continent except South America and Antarctica. The star-nosed mole lives in North America. It is like other moles because it lives underground and has a soft, black coat, small, dark eyes and very strong arms! It is one of the smallest moles but it is really strange because it has a very unusual nose. Its nose is very small but it has 22 *tentacles* coming out from it, which are a bit like fingers. This means that the mole's nose looks like a pink star. That is why it is called the star-nosed mole.

The 22 *tentacles* on its nose mean that the star-nosed mole is an excellent hunter. It can't see very well but it is very fast at catching and eating insects. It can eat faster than any other animal. It lives in wet places often near rivers. It does most of its hunting underground during the day. If it wants food from above ground, it will only come out at night.

Like other moles, the star-nosed mole is a good swimmer and sometimes swims under ice. The star-nosed mole is the only mole that can smell under water. This helps it find underwater insects and tiny fish to eat.

For questions 1-3, please answer in complete sentences. (2 marks each)

1. Where in the world does the unusual mole come from?

2. Which part of its body is unusual?

3. What can this mole do that other moles can't do?

Anglia Examinations Sample Material

For questions 4-8, tick (✓) the box. (1 mark each)

Marks Awarded

4. The mole is bigger than most other moles.

True ☐ False ☐

5. It can eat very quickly.

True ☐ False ☐
