Anglia Examinations Sample Paper

Section R1 (12 marks)

Read the passages about Andrew and Brian and answer the questions. For each question, choose either A(Andrew) or B(Brian). You need to choose each person more than once.

Marks Awarded

Andrew (A)

I'm 28. I don't have any sisters but I have three brothers. I see my brothers once a month because they live in another town. I live with my friend, Lola. Our house is next to the shops. It has a big dining room but a small kitchen and garden. I don't like cooking so I often go out for dinner. I love pizza. At the weekends, Lola and I watch films on TV because we like to stay at home.

Brian (B)

I'm 23 years old and I have two brothers and two sisters. They come to my house most Saturdays. We all live in the same town. I live on my own. My house is near the train station. It's small but the garden is really big. I love making food for my family every week, especially pasta. On Sundays, I see my friends because we play tennis. I'm not keen on television and prefer playing sport to watching it.

Which person, A(Andrew) or B(Brian),...

has brothers and sisters?	*example*	*B*
usually sees his family every week?	1	
lives with his friend?	2	
has a house near the shops?	3	
has a large garden?	4	
often cooks for his family?	5	
enjoys watching TV?	6

Anglia Examinations Sample Paper

Section R2 (13 marks)
Read the passage and answer all the questions.

Marks Awarded

Millipedes

Millipedes are insects with lots of legs. The name means 'a thousand feet' but they don't usually have that many. The average millipede has fewer than 100 legs. Before 2021, the record for legs on a millipede was 750. That was in California, USA. Then in 2021, a team of scientists who were working in Australia, discovered a millipede with *more* than a thousand feet. They counted 1,306 to be exact. They were amazed to find this new millipede, and gave it the name *Eumillipes persephone*.

This *Eumillipes persephone* was ten centimetres long, which is seven centimetres longer than the California millipede. It looked different from others because it was much thinner and didn't have any eyes. It was in a deep hole, 60 metres underground. Scientists say the *Eumillipes persephone* can get further down than other millipedes because it uses its many legs. Later, they found other *Eumillipes persephone* millipedes. There were two babies and five more adults.

These millipedes were different sizes. The one with 1,306 legs was female. This was the highest number of legs but one of the males had only 778 legs. Scientists are confident the new millipedes can live three years longer than most other millipedes, which only live for about two years. The new ones may be able to live for five years.

For questions 1–3, please answer in complete sentences. (2 marks each)

1. In what country did the scientists find the new millipede?

2. How many legs did the first *Eumillipes persephone* have ?

3. How can the *Eumillipes persephone* go deeper underground than other millipedes?

Anglia Examinations Sample Paper

For questions 4–8, tick (✓) the box. (1 mark each)

Marks Awarded

4. Most millipedes have over 100 legs.

True ☐ False ☐

5. The new millipedes were the same age.

True ☐ False ☐

6. The new millipede with the most legs was female.

True ☐ False ☐

7. How did the new millipede look different to others?

A It was shorter.
B It wasn't as thin.
C It had no eyes.

A ☐ B ☐ C ☐

8. Most millipedes can usually live for

A two years.
B three years.
C five years.

A ☐ B ☐ C ☐

Write the words in the box (1 mark each)

9. Find the word in the passage which means the **OPPOSITE** of:

not sure ***(paragraph 3)*** ☐

10. Find the word in the passage which means the **SAME** as:

very surprised ***(paragraph 1)*** ☐
